

**TRANSIENT AIRCRAFT MAINTENANCE
Combat Readiness Training Center (CRTC)**

1. Objective. As prescribed in AFI 38-201, *Determining Manpower Requirements*, this Air National Guard Manpower Standard (ANGMS) quantifies the full-time manpower requirement to accomplish the tasks described in the work center description at attachment 1 for varying levels of workload volume in the Transient Aircraft Maintenance function of the CRTC.

2. Authority. The 66-series of Air Force and Air National Guard directives contain policy and procedural guidance for the Transient Aircraft Maintenance function. This ANGMS has been developed in accordance with procedures for development of single location manpower standards contained in AFPAM 38-208V1, *Air Force Management Engineering Program (MEP) Processes*, formerly AFR 25-5.

3. Applicability. This standard applies to the Combat Readiness Training Center located at Gulfport-Biloxi Regional Airport, Gulfport, MS only. This standard applies to peacetime operations only.

4. Standard Data:

a. Classification. Type III.

b. Approval Date. 2 February 1993.

c. Man-Hour Data Source. Operational Audit (historical record and technical estimate techniques).

d. Standard Man-Hour Equation. $Y = 63.13 + 5.016X_1 + 25.26X_2 + 1.754X_3 + 1.934X_4$.

e. Workload Factors (WLFs):

(1) Title:

(a) X_1 . A Transient Aircraft Serviced.

(b) X_2 . A Visiting Flying Unit Supported.

(c) X_3 . A Transient Fighter Aircraft Serviced.

(d) X_4 . A Transient Cargo or Passenger Aircraft Serviced.

(2) Definition:

(a) X_1 . The average number of total transient aircraft serviced per month to include: parking, fueling, launching, and other required emergency/routine maintenance tasks performed for all transient aircraft regardless of airframe configuration.

(b) X_2 . The average number of visiting flying units supported during the most recent completed fiscal year and the two previous fiscal years. (This will produce a three-year average). A flying unit is defined as any unit that deploys for the purpose of performing a flying mission while deployed to the CRTC. The flying unit will be considered a visiting unit when it is deployed for any of the following missions: annual training, operational readiness inspection, operational readiness exercise, or routine mission exercise.

(c) X_3 . The average number of transient fighter aircraft serviced per month. Count fighter aircraft only.

(d) X_4 . The average number of transient cargo or passenger aircraft serviced per month. Count cargo or passenger aircraft only.

(3) Source:

(a) X_1 . Locally maintained service log, AF Form 861, Base/Transient Job Control Number Register.

(b) X_2 . Locally generated CRTC Training Schedule maintained by the Base Operations and Training section, FAC 4700.

(c) X_3 . Locally maintained service log, AF Form 861, Base/Transient Job Control Number Register.

(d) X_4 . Locally maintained service log, AF Form 861, Base/Transient Job Control Number Register.

5. Application Instructions:

- a. The valid man-hour range of 286.61 to 477.68 will not be exceeded.
- b. Calculate the correct value for each WLF identified in paragraph 4e above. Substitute these values for the appropriate value of X in the manpower equation in paragraph 4d above. (WLF X₂ must be comprised of the last three years of data to produce a three-year monthly average.)
- c. Divide the resultant man-hours by the current military Man-Hour Availability Factor to calculate the total manpower requirement.
- d. Refer to attachment 2, AF Form 1113, Standard Manpower Table, to determine specific Air Force specialties.

6. Statement of Conditions. The conditions listed below had no affect on the development of this standard, nor will they affect future applications. Analyses of these levels of service indicate no manpower impact:

- a. Minimum response rates.
- b. Minimum manpower levels.
- c. Standardized crew complements.
- d. Safety considerations.
- e. Aircraft turn-around time.
- f. Length of waiting periods.
- g. Levels of backlog.
- h. Hours of operation.
